### **American Wire Group Introduces AerialGuard® Cable System Solutions**

**June 5, 2023, Miami, Florida** – American Wire Group (AWG), the nation’s leading supplier of wire and cable products for the electrical utility and renewable energy markets, is pleased to announce the launch of AerialGuard® System Solutions. This full package solution, which includes tree wire and spacer cable, spacers, brackets, insulators, and other hardware, is in stock at AWG’s national distribution centers.

AWG's AerialGuard® Cable Systems are intended for use in overhead primary and secondary distribution systems rated 15 kV, 25 kV and 35 kV, typically for system hardening against wind or storm damage outages, fire liability mitigation or where space is limited for multiple circuits, such as overhead feeders on renewable energy power plants. In the early roll-out, customers have expressed positive feedback to the world-class quality and on-time service demonstrated by AWG’s AerialGuard® system.

“We understand that utilities are focused on hardening networks and improving reliability to withstand the increase and frequency of storms and fires. Our AerialGuard® products will provide our customers with a full solution to solve these challenges.” said Michael Blaha, Vice President, Utility Division. “We’re excited to enhance our solution with the full-market rollout of AerialGuard® for our electric utility customers, and we are now welcoming inquires for the USA, Canadian and international markets.”

To learn more about our AerialGuard® Cable Systems Solutions, visit us at [www.buyawg.com](http://www.buyawg.com) or contact us at [sales@buyawg.com](mailto:sales@buyawg.com).

Established in 2001, American Wire Group (AWG) is the leading material supplier of wires, cables, components, and accessory solutions. We hold the nation’s largest inventory of products used in the power T&D, substation, solar, wind, battery energy storage, and EV infrastructure markets. Our team supports customers with full services including cable management, cable engineering and design, supply chain, emergency services, and more.
