

American Wire Group (AWG) is the leading supplier of wire & cable, hardware, equipment, and accessories for the power utility, renewable energy, and data center markets. We've earned our reputation through exceptional service, high-quality products, and reliable, on-time delivery.

With strategically located distribution centers across the United States, AWG maintains one of the nation's largest inventories—allowing us to serve as a true single source solution for complex infrastructure projects. We also supply transformers, poles and pole line hardware, AerialGuard® tree wire and spacer cable systems, and solar balance-of-system components.

Backed by decades of experience, we deliver high-performance products supported by engineering expertise, coordinated logistics, and responsive project support from start to end.

### Engineering & Value-Added Solutions

Our engineering team provides technical leadership across application engineering, test interpretation, and standards development. We support customers through cable testing programs, fault and failure analysis, industry specification development, and quality management—helping ensure designs, materials, and installations meet performance, reliability, and compliance requirements.

Our value-added services include custom cut-to-lengths, paralleling, pulling eyes, reel recycling, and so much more. These services are designed to reduce field labor, minimize material waste, and streamline installation—helping crews work more efficiently while keeping projects on schedule and within budget.

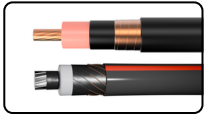

### Emergency Response Services

AWG's emergency response team is available around the clock to support utilities and critical infrastructure during natural disasters and unexpected outages. With nationwide inventory and rapid deployment capabilities, we ship within hours—not days—to help restore essential power systems quickly and safely.

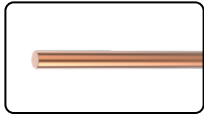

When you are ready to power what's next, American Wire Group is ready to help you Empower A Better World.

## Our Products

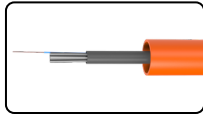

**PowerGuard®** Underground Medium Voltage Power Cables (EPR or TR-XLPE) 5 kV - 35 kV, MV-90 and MV-105

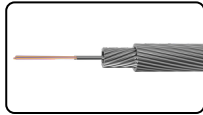

**Bare Copper - Stranded or Solid; Soft Drawn, Medium-Hard, Hard Drawn & Tinned**

**BatteryGuard® DLO**

**Fiber in Duct**

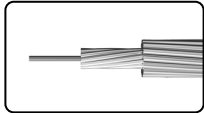

**OPGW & Hardware**

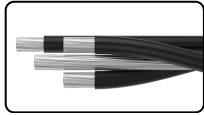

**SunGuard®** 0.6 kV-2 kV PV Cables - Aluminum or Copper

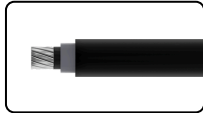

**TowerGuard®** 0.6 kV - 2 kV Industrial Power Cables, CCA & CU DLO

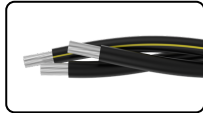

**Bare Aluminum Conductors ACSR, AAAC, AAC, ACAR, ACSS**

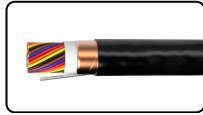

**Overhead Service Drop-Duplex, Triplex, Quadruplex**

**AerialGuard®** Tree Wire & Spacer Cable Systems

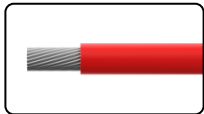

**Underground Secondary URD Cable 600 V Duplex, Triplex, Quadruplex**

**ControlGuard®** Substation Control Cables, 0.6 kV - 2 kV

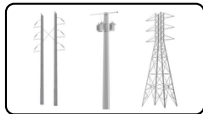

**Guy Wire / Shield Wire Galvanized (OPGW)**

**CWC LowFriction® XHHW-2 and THHN (All Colors)**

**CSA Type USE190, RW90, RWU90**

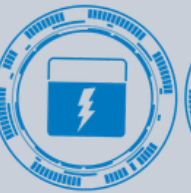

**Poles & Pole Line Hardware**

**Transformers**

**Hardware & Accessories**

## National Distribution Centers

AWG operates strategically located distribution centers across the United States, maintaining one of the nation's most extensive inventories. Our inventory depth is robust enough to supply a 200 MW solar project entirely from stock, reducing lead times and minimizing project risk. With a strong nationwide footprint, we can provide reliable 1-2 day delivery to project sites—helping customers avoid delays, maintain schedule certainty, and keep critical infrastructure projects moving forward.
