

AWG

AMERICAN WIRE GROUP

Electric Vehicle Infrastructure Solutions

Who We Are

American Wire Group (AWG) is the leading material supplier of wires, cables, hardware, equipment and accessories for transmission and distribution power lines, substations, wind and solar farms, battery storage, and electric vehicle (EV) infrastructure markets.

AWG's primary mission is to provide a complete solution from inventory, in all aspects of electrical transmission & distribution systems, and power generation. Our range of products includes low voltage, medium voltage, high voltage, extra high voltage, control cables, and fiber optics. This also includes power equipment, such as transformers, switchgears, panel boards, and more.

Our People

- Over 100 employees
- Professional Engineering Team (Applications, Cable Design & Electrical)
- AWG sales professionals and reps covering the United States & Canada

EV Infrastructure Solutions

When building your commercial, fleet applications or DC fast charging infrastructure, AWG's team provides full project technical and procurement capabilities.

We maintain a large inventory in a national network of distribution centers and warehouses. AWG lowers your total project material costs for EV infrastructure deployment.

AWG will take your EV infrastructure project from conception to construction and complete implementation.

Guaranteed Performance

We aim for 100% customer satisfaction. It's not what we promise to do; it's our record of doing what we promise!
