AMERICAN WIRE GROUP
EMPOWERING A BETTER WORLD

Wind Energy Solutions

Wind energy infrastructure is built for decades of operation in some of the most demanding conditions. Whether supporting a new installation or extending the life of an existing project through repowering existing wind farms, dependable materials and coordinated project execution are essential to long term performance.

From the turbine and tower to underground collection and interconnection, every component plays a role in moving energy safely and reliably. AWG brings together the wire and cable, equipment, hardware, accessories, engineering expertise, and logistical support needed to address these applications while helping project teams manage schedules, specifications, and material requirements.

Building wind infrastructure for long term performance starts with solutions engineered to withstand demanding conditions, strengthen reliability, and support the evolving needs of the energy system.

American Wire Group supports wind projects as a single source solution provider for wire and cable, hardware, equipment and accessories. With extensive nationwide inventory, technical expertise, and value added services, we help customers manage material requirements and keep projects moving from planning through installation.

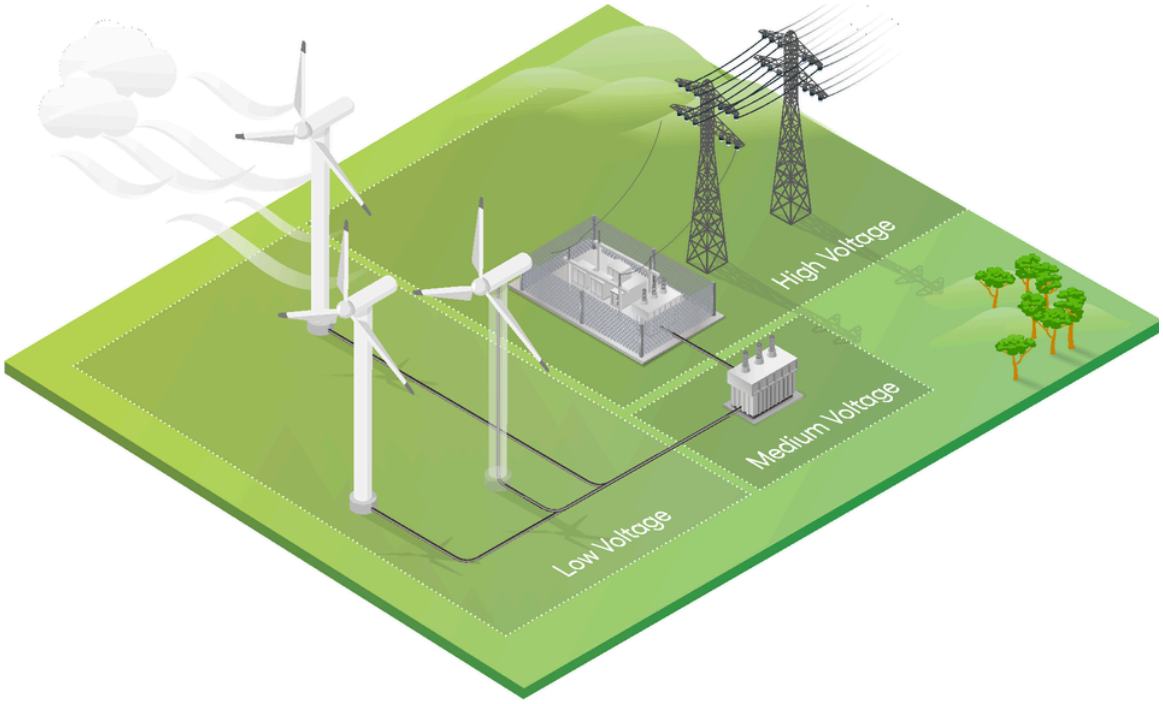
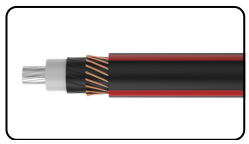
American Wire Group + Wind Energy Solutions

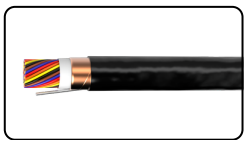
Supporting Today's Wind Projects for Tomorrow's Energy Needs



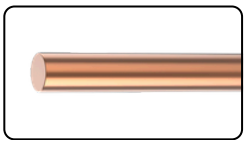


PowerGuard® Medium Voltage
Power Cables (TR-XLPE)
5 kV - 35 kV
MV-90 and MV-105

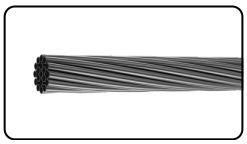
TowerGuard®
0.6 kV - 2 kV Industrial Power
Cables, CCA & CU DLO



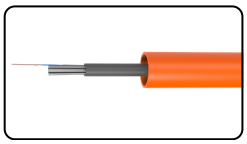
ControlGuard®
Substation Control
Cables, 0.6 kV - 2 kV



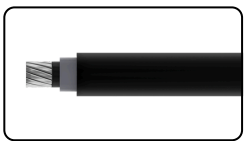
Grounding Cables



Transmission Wire

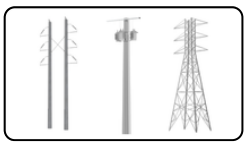


Fiber in Duct



AerialGuard®
Tree Wire & Spacer Cable Systems

Transformers



Poles and Pole Line Hardware

Locations

Services

AWG provides essential product support and value added services that help our customers execute wind energy projects with greater efficiency and reliability.

We offer the technical expertise and responsive delivery needed to support wind projects from early planning through final installation.

Our services include:

- Cable engineering and design aligned with project specifications and application requirements
- Value added cable services, such as custom cut to lengths to minimize jobsite waste, are available at each of our facilities
- Fast 1-2 day nationwide delivery to keep project schedules on track
- Technical product support and application guidance for T&D conductors, poles, transformers, and other applicable hardware and accessories
- Project management support coordinated with construction and maintenance schedules
