

**AWG**  
AMERICAN WIRE GROUP  
EMPOWERING A BETTER WORLD

# Capability Statement

## AWG Success Story

**Established in 2001**, American Wire Group (AWG) has become the leading material supplier of wires, cables, and accessories solutions for the power transmission, distribution, substation, solar, wind, battery energy storage, and EV infrastructure markets.

**Guaranteed Performance**  
We aim for 100% customer satisfaction. It's not what we promise to do; it's our record of doing what we promise

**Our People**  
80 Employees  
Professional Engineering Team (Applications, Cable Design & Electrical)  
Sales professionals located worldwide  
Over 200 years of experience

**CAGE #:** 1VQG3  
**DUNS:** 007371615  
**FSC Product Codes:** 6145, 6150, 5975, J061  
**Class IV Electrical Supplies**

## CORE COMPETENCIES

American Wire Group's primary mission is to provide a complete solution from inventory, in all aspects of electrical transmission & distribution systems, and power generation. Our range of products includes low voltage, medium voltage, extra high voltage, control cables as well as fiber optics for the electric power grid, as directed by the "Bipartisan Infrastructure Law" for Grid Modernization.

AWG's comprehensive capabilities include delivering more than just wire and cable. We supply critical materials needed such as transformers, conductors, poles, fuse links, connectors, insulator, cross-arms, arrestors, and anchor rods and all pole line hardware.

Management has developed the capability to service projects from the development phase with estimating material costs, through delivery of materials during construction, followed by service to the site for a full life cycle approach.

## DIFFERENTIATION

### We are empowering the buildout of the electric vehicle charging infrastructure across the country

The demand for electric vehicles has put an increased energy demand on utilities in supplying power to these stations.

In support of this, AWG has created the EV Initiative. We've invested millions of dollars in EV power cable inventory, trained our sales teams, and hired a team of EV Specialists to provide these solutions to our partners and customers. Our comprehensive support and dedicated resources are available to help your business.

AWG is your single source material supplier for EV power cables that support the infrastructure buildout.

We pride ourselves on being a wonderful vendor and we provide budgetary unit pricing estimates for any items as well as estimated shipping FOB anywhere, shipped via air freight.

## COMPANY DATA

### Headquarters

- Miami, FL

### Offices & Warehouses

- Miami, FL
- Mechanicsburg, PA
- Los Angeles, CA
- Chicago, IL
- Houston, TX
- Toronto, ON
- South Carolina
- Connecticut
- Puerto Rico

### NAICS

423610: Electrical Apparatus and Equipment, Wiring Supplies, and Related Equipment Merchant Wholesalers

335999: All Other Miscellaneous Electrical Equipment & Component Manufacturing

335311: Power, Distribution, and Specialty Transformer Manufacturing

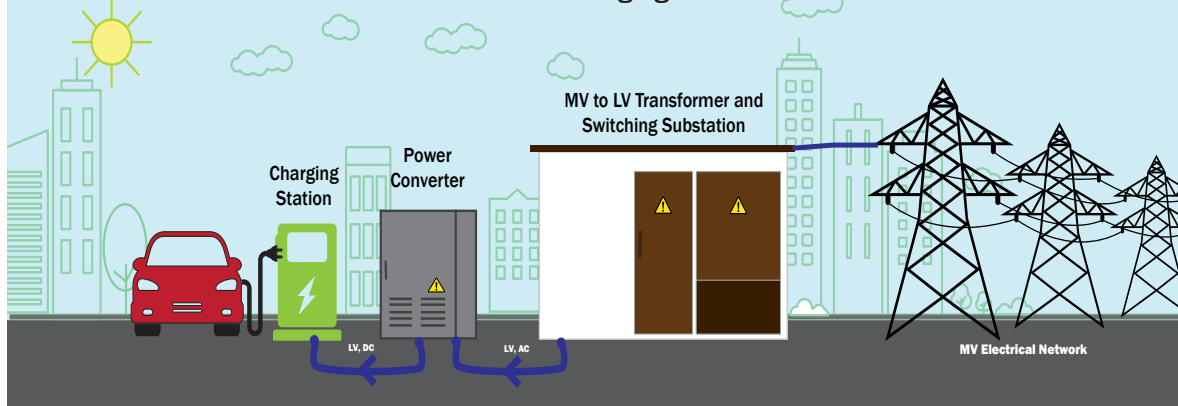

331318: Other Aluminium Rolling, Drawing, and Extruding

331420: Copper Rolling, Drawing, Extruding, and Alloying

335929: Other Communication and Energy Wire Manufacturing

335931: Current-Carrying Wiring Device Manufacturing

### Electrical Charging Buildout

## OUR CLIENTS

AWG's primary customers are Federal, State, City Government agencies, prime contractors, electrical utilities, owners, developers, EPCs, and electrical contractors within the electric power market
